

AcouPlex IP1

Isolation Platform

- A totally new composite material – exclusive to MusicWorks
- Developed from the ground up to deliver superior isolation
- Improvements to dynamic range, pitch, harmonic accuracy, stereo staging, and timing of your system
- A special edition MusicWorks ReVue equipment rack takes full advantage of this new platform

Also available

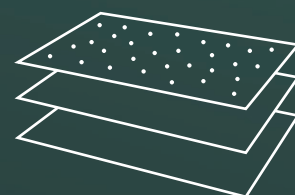

For over 10 years MusicWorks have been developing acoustic isolation products. One of the most significant limiting factors in a high performance audio system, in domestic listening rooms, is acoustic feedback. The sound from the system translates into an electrical signal producing an amusical distortion which corrupts the dynamic range, pitch, harmonic accuracy, stereo staging, and timing of a system.

Effective materials over the years have included acrylic, PEEK, and now a brand new composite which we have developed – AcouPlex.

AcouPlex has evolved through hundreds of empirical trials using different materials in weird and wonderful combinations.

Available now in limited numbers and in limited outlets, AcouPlex represents the most significant improvement in damping & isolation that we have heard.

Isolation Products

AcouPlex IP1

Isolation Platform

An isolation platform that will provide superb results on any commercial equipment table, or as a stand-alone support with MusicWorks P-Cone L.

340mm x 410mm x 5mm (nominal)

AcouPlex Discs

50mm Isolation Discs

Isolation feet for almost any electronics / speaker product. These 50mm discs provide serious improvements in music reproduction.

50mm diameter x 5mm thick (nominal)

P-Cone L

50mm Isolation Feet

Our PEEK isolation cones present a flexible approach to equipment isolation. Use as equipment supports or highly effective loudspeaker feet.

Use 3 or 4 cones to effectively isolate equipment from mechanical vibrations.

50mm diameter x 25mm high (nominal)

P-Cone 2

20mm Isolation Feet

Our PEEK isolation cones present a flexible approach to equipment isolation. Use as equipment supports or highly effective loudspeaker feet.

Use 3 or 4 cones to effectively isolate equipment from mechanical vibrations.

20mm diameter x 25mm high (nominal)

ReFlex Ultra Gen 3

6-way power block

- New cryogenically treated power sockets with non-metallic fixings
- New PEEK fixings & isolation spikes
- Ultra high integrity star earth arrangement
- Cryogenically treated internal wiring & connectors
- Internal power ring

Also available

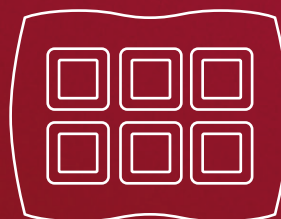

The ultimate expression of what we know about power distribution.

The top-of-the-range ReFlex Ultra G3 builds on over 10 years of research into improved power sockets and the use of PEEK for vibration isolation.

Additional improvements included in the Ultra model include uprated internal connections & conductors, specially selected power sockets complete with de-coupling spacers, optimised star earth path, and the use of non-metal fixings throughout.

PEEK components have been incorporated to provide both structural integrity and vibration isolation.

For even further improvements to dynamic range, musical texture and coherence an additional upgrade is available through the use of a newly-developed AcouPlex Base.

Power Blocks

ReFlex Ultra Gen 3

6-way Power Block

The ultimate expression of what we know about power distribution. 'Ultra' improvements include updated internal connections & conductors, specially selected power sockets complete with de-coupling spacers, optimised star earth path, and the use of non-metal fixings throughout. PEEK isolation and corner fixings further enhance the performance of this block.

ReFlex Lite

6-way Power Block

Our best-selling power distribution block provides a cost-effective approach to accessing the coherence that a MusicWorks mains block brings to a system. Featuring acrylic sandwich construction, star earth cabling, and carefully chosen (by audition) power sockets. Power inlet is via an IEC socket, allowing the consumer the choice of power cables supplying the block.

Block Upgrades

AcouPlex Base

Replacement ReFlex Block Base

Replaces the existing acrylic ReFlex block base with the incredible advantages of AcouPlex. Expands dynamic range, musical textures and coherence.

P-Cone L

50mm Isolation Feet

Our PEEK isolation cones effectively isolate your power block from mechanical vibrations.
50mm diameter x 25mm high (nominal)

ReVue Ultra

Modular Equipment Table

- PEEK engineering thermoplastic columns for ultimate isolation
- Non-metal construction throughout
- Modular system – from single platform to 7-tier stand
- Builds on the award-winning ReVo range
- Two shelf sizes, two shelf thicknesses, and 4 spacing options
- Ideal for the new AcouPlex Isolation Platforms

Also available

Following on from our hugely successful and award-winning ReVo products, ReVue offers even greater flexibility and modularity, whilst retaining all the isolation properties that made it such a reviewers' favourite. This 'Ultra' model includes PEEK columns to comprehensively outperform all our previous equipment tables.

ReVue works all the way from a single equipment platform up to a 7-tier stand. The modular construction makes it easy to purchase what you need now, with the ability to extend, split or upgrade the stand as the need arises.

Shelves can be supplied with a shape ideally matched to our new AcouPlex Isolation Platform (shown in the image).

Equipment Tables

ReVue Ultra

Equipment Table

This 'Ultra' model includes 50mm PEEK engineering thermoplastic columns to comprehensively outperform all our previous equipment tables.

Modular system – from single platform to 7-tier stand

ReVue & P-ReVue

Equipment Table

Following on from our hugely successful and award-winning ReVo products, ReVue offers even greater flexibility and modularity, whilst retaining all the isolation properties that made it such a reviewers' favourite.

ReVue features our proven acrylic spacers.

P-ReVue offers even greater mechanical isolation by using PEEK engineering thermoplastic spacers.

Modular system – from single platform to 7-tier stand

Components

Simply purchase what you need now, with the ability to extend or split the stand as the need arises.

To build a table, start with the base shelf and choose size, colour and thickness. Then add a termination kit of your chosen material (Acrylic or PEEK). Add 4 spacers and a shelf for each extra layer as needed.

		Shelf Thickness	
		10mm	15mm
Shelf	Standard (570x425mm 440mm equipment width)	✓	✓
Shelf	Large (625x470mm 495mm equipment width)	✓	✓
Skeleton Shelf	Large (for use with AcouPlex IP1)	✓	✓

		Material		
		ReVue Acrylic (Ø25mm)	P-ReVue PEEK (Ø20mm)	ReVue Ultra PEEK (Ø50mm)
Spacers	80mm (can be added to 155mm spacer)			✓
Spacers	100mm	✓	✓	
Spacers	150mm	✓	✓	
Spacers	155mm			✓
Spacers	200mm	✓	✓	
Spacers	320mm	✓	✓	
Termination Kit	(top and base fixings & spike kit)	✓	✓	✓

MusicWorks

ReVive

1.8m

IEC Power Cable

- Top-of-the-range MusicWorks specification
- Cryogenically treated
- Low impedance earth path
- Furutech FI50 Rhodium-plated IEC plug
- UK-specified version of the Furutech Rhodium-plated mains plug

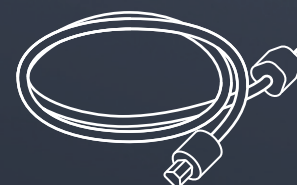

Also available

ReVive exemplifies the current state-of-the-art in power cables.

A highly-tuned compound power cable with our proven cryogenic treatment. This top-of-the-range ReVive power cable features a custom designed cable, with specific attention given to providing a low-impedance earth path.

ReVue is completed with top of the range Furutech FI50 Rhodium-plated IEC plug and the latest UK-specified version of the Furutech Rhodium-plated mains plug.

Cables

ReVive

1.8m IEC Power Cable

ReVue exemplifies the current state-of-the-art in power cables: a highly-tuned compound power cable with our proven cryogenic treatment. This top-of-the-range ReVive power cable features a custom-designed cable, with specific attention given to providing a low-impedance earth path.

ReVue is completed with top of the range Furutech FI50 Rhodium-plated IEC plug and the latest UK-specified version of the Furutech Rhodium-plated mains plug.

Nominal length 1.8m

ReVive Lite 2

1.8m IEC Power Cable

Using what we learned in developing the new ReEntry 2 cable, this highly-tuned compound power cable gives performance you could only expect in a power lead costing many times its price.

The screened dual-compound cabling on this lead is a simplified version of the 'Ultra' lead. This cable is supplied with the Furutech Rhodium-plated 13A plug, and carefully selected (by audition) IEC socket.

Nominal length 1.8m

ReEntry 2

1.8m IEC Power Cable

The ReEntry 2 builds on the performance of the original ReVive power lead. This cable is much more than an affordable introduction to MusicWorks power distribution capabilities. A large amount of the clarity and coherence of our top products is provided by this carefully tuned, dual-screened cable.

Nominal length 1.8 m
