

Accuphase

NEW C-2300

PRECISION STEREO CONTROL CENTER

For more than half a century, Accuphase has continued its relentless pursuit of creating the ideal volume control circuitry. The C-2300 preamplifier utilizes Balanced AAVA – the successor of the AAVA system – to control volume without sacrificing vibrancy in the source sound. A newly added 4-band tone control enables fine adjustments to sound tone. Experience the sonic depth from the combined sound quality and superior features the C-2300 provides.

- Balanced AAVA – the successor of the AAVA volume control
- A new 4-band tone control enables fine adjustment
- 5 Line and 2 Balanced inputs
- Independent left and right power supplies and unit amplifiers
- Phase setting memory for each input
- Highly reliable logic-controlled signal switching relays
- High-quality headphone amplifier
- Expandable with add-on boards for digital signals and turntables
