

# ReFlex Ultra Gen 5

6-way power block

- Brings the ultimate isolation properties of AcouPlex™ to the ReFlex Block design
- AcouPlex™ block chassis & AcouPlex™ feet and top caps
- PEEK internal fixings
- Ultra high integrity star earth arrangement
- Cryogenically treated internal wiring & connectors

Also available

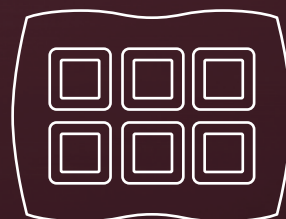

Everything we know about silencing environmental noise has been thrown at this new version of the ReFlex mains block. The results are very apparent and musically profound.

The top-of-the-range ReFlex Ultra G5 builds on over 10 years of research into improved power sockets and the use of unique materials to achieve ultimate vibration isolation.

The use of our own specially-developed AcouPlex™ layers throughout the chassis is reserved for this very special flagship model and provides even further improvements to dynamic range, musical texture and coherence.

Additional features include uprated internal connections & conductors, specially selected power sockets complete with de-coupling spacers, optimised star earth path, and the use of non-metal fixings throughout.

PEEK components have been incorporated to provide both structural integrity and vibration isolation.

# Power Blocks

## ReFlex Ultra Gen 3

6-way Power Block

Now including a 10mm AcouPlex™ base as standard as well as the 'Ultra' improvements of uprated internal connections & conductors, specially selected power sockets complete with de-coupling spacers, optimised star earth path, and the use of non-metal fixings throughout. PEEK isolation and corner fixings further enhance the performance of this block.

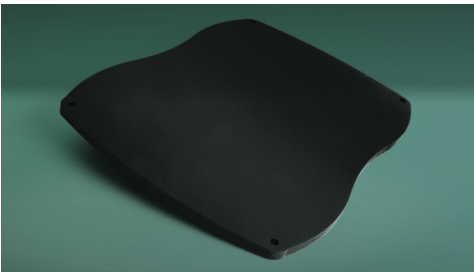

## ReFlex Lite

6-way Power Block

Our best-selling power distribution block provides a cost-effective approach to accessing the coherence that a MusicWorks mains block brings to a system. Featuring acrylic sandwich construction, star earth cabling, and carefully chosen (by audition) power sockets. Power inlet is via an IEC socket, allowing the consumer the choice of power cables supplying the block.

# Block Upgrades

## AcouPlex™ Base

10mm ReFlex Block Base

Replaces the existing acrylic ReFlex block base with the incredible advantages of AcouPlex™. Expands dynamic range, musical textures and coherence.

## AC40 & ACW40

Spiked Cone & Bevelled Spiked Cone

Add AC40 or ACW40 cones in groups of three or four to bring the further isolation advantages of our exclusive AcouPlex™ material to your acrylic blocks.
